

INNOVATIONS FOR LIVING®

Classic® AR Shingles

Classic® AR Shasta White†

Classic® AR Shingles

Classic® AR three-tab shingles offer everything you need in a great roof—solid value and durability. They are engineered to resist roof discoloration from algae growth and come with an Algae Resistance Limited Warranty.* They carry a 20-Year Limited Warranty,* 60-MPH Wind Resistance Limited Warranty* and Class A UL Fire Rating—the industry's highest rating.

ENERGY STAR® is for roofs too

Similar to the energy-efficient appliances in your home, roofing products can provide energy-saving qualities. Owens Corning Classic AR roofing shingles in Shasta

White can help reduce your energy bills when installed properly. These shingles reflect solar energy, decreasing the amount of heat transferred to a home's interior—and the amount of air conditioning needed to keep it comfortable. Actual savings will vary based on geographic location and individual building characteristics. Call 1-800-GET-PINK™ or 1-888-STAR-YES for more information.

†Owens Corning strives to accurately reproduce photographs of shingles. Due to manufacturing variances, the limitations of the printing process and the variations in natural lighting, actual shingle colors and granule blends may vary from the photo. The pitch of your roof can also impact how a shingle looks on your home. We suggest that you view a roofing display or several shingles to get a better idea of the actual color. To accurately judge your shingle and color choice, we recommend that you view it on an actual roof with a pitch similar to your own roof prior to making your final selection. Color availability subject to change without notice. Ask your professional roofing contractor for samples of colors available in your area.

Your peak performance system.

It takes more than just shingles to create a high-performance roof. It requires a system of products working together. The Owens Corning Roofing System is a lineup of key products that can help provide maximum durability for a roof. And the most protection for a home.

- a. VentSure® Ventilation Products.** Help protect the roof from moisture damage, such as warping and cracked shingles, by releasing heat from the attic.
- b. Hip & Ridge Shingles.** An attractive way to help protect the ridge vents so they can better do the job of preventing moisture damage to the roof deck.
- c. WeatherLock® Waterproofing Underlayment Products.** Help guard vulnerable areas where water can do the most damage to a roof: eaves, valleys, dormers and skylights.
- d. Owens Corning Shingles.** Add durable beauty to the home. Shingles are the first line of defense against the elements.
- e. Owens Corning Starter Shingle Products.** The first step in the proper installation of shingles.
- f. Undereave Ventilation Products.** Help prevent moisture buildup in the attic by working with ridge vents to keep air moving.
